RE: New Service Pro Mobile

Date: April 21, 2021

AVAILABLE NOW

The new mobile app from Service Pro is now available for download. Before downloading the new app, be sure to delete the old app from your device prior.

Apple Users - To download on an iOS Apple device use this quick link <https://apps.apple.com/us/app/service-pro/id1559014797>, search for Service Pro on the App Store or use the following QR code to go directly to the app on the Apple App Store.

If doing a manual search in the Apple App Store, be sure you are searching for “service-pro” that includes the hyphen, (otherwise you will only find the old app by our old supplier with showmethепarts software)

Android Users - To download on an android device use this quick link <https://play.google.com/store/apps/details?id=com.servicepro> or use the following QR code to go directly to that app

This new app is loaded with features and capabilities that makes selecting the Service Pro products easier than ever. In addition to identifying filter and wiper blade applications, the new mobile app from Service Pro includes lubricant fluid recommendations! By adding this data resource to our mobile app puts unparalleled power into the palm of the user's hand!

Once the subject vehicle is identified, the app will guide the user to specific product information. Looking for the fastest route to product applications? Use the *Scan Vin* feature which scans not only bar code but also the actual VIN characters. This is critical as automakers are moving away bar coded VINs.

Getting Started - Once you've downloaded the new app, you can begin exploring all the features. AIOD and PGI will host a Zoom meeting to demonstrate the app Look for your email invitation to join the demo coming soon.

Contact AIOD at 800/313-2463 with any questions or comments regarding this powerful new tool from Service Pro!
